BANKING AND RAILWAY STATISTICS, IRELAND.

(DECEMBER, 1912.)

REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF
AGRICULTURE AND TECHNICAL INSTRUCTION
FOR IRELAND.

SIR,

I have the honour to submit the following Half-yearly Report, July-December, 1912, on the Banking and Railway Statistics of Ireland. As regards Banks and Banking in Ireland the Report states (I.) the deposits and cash balances in Joint Stock Banks; (II.) the deposits in Post Office and Trustees Savings Banks in Ireland; (III.) the amount of the Government Funds, India Stocks, and Guaranteed Land Stocks upon which dividends are payable at the Bank of Ireland; (IV.) the Note Circulation of, and the amount of Coin held by, the Irish Banks of Issue; and (V.) the development of Co-operative Credit Associations in Ireland. As regards Railways in Ireland the Report states (1) the weekly traffic receipts; (2) the total traffic in passengers and goods and the receipts therefrom; (3) the total authorised share and loan capital, &c.; and (4) the total expenditure, rolling stock, &c. Two Statistical Diagrams are placed in this Report to illustrate respectively the growth of Irish Banking and of Post Office and Trustees Savings Banks since the year 1893 (page 14), and the weekly receipts of Irish Railways in each week of the years 1911 and 1912 (page 36).

BANKS.

*I. Deposits and Cash Balances in Joint Stock Banks.

The deposits and cash balances in the Irish Joint Stock Banks at the close of December, 1912, as shown in Table I., stood at £57,651,000 (exclusive of £2,649,000 Government and other Public Balances in the Bank of Ireland), as compared with £57,095,000 at the corresponding period in the year 1911, being an increase of £556,000.

It is estimated that the amount due to the Joint Stock Banks on the 31st December, 1912, on account of Bills Discounted, Advances to Customers and Loans on Security was about £44,000,000. This latter figure, however, is only an estimate as complete data are not available.

* Deposits and cash balances, as distinguished from bills discounted and advances to customers.

The following Tables I. and IA., show the growth of the deposits and cash balances in Irish Joint Stock Banks.

1912, "	57,651,000	556,000	—

Comparing the amount on the 31st December of each of the last twenty years with the amount on the 31st December of the previous year, it is found that there was an increase in every instance with the exception of the years 1901 and 1905.

* The names and the dates of foundation of the Banks, the combined statistics of which are included in Tables I. and I. (A.), are as follows. Those marked with an asterisk (*) are Banks of Issue.

Table I. (A.) in which the amounts of deposits and cash balances are compared by half-years, shows that there was a decrease of £101,000 in December, 1912, as compared with June in the same year. This decrease was, no doubt, due to the dislocation of trade caused by the restrictions on the movements of live stock necessitated by the outbreak of Foot-and-Mouth Disease.

, 31st December,	57,651,000	—	101,000

Comparing the amount on the 31st December in each of the last eleven years with the amount on the 30th of the previous June, there was an increase in every instance, except in amount on 31st December, 1912, which shows a decrease as compared with that for 30th June, 1912. However if the comparison is made between the amount on the 30th of June and the amount on the 31st of the previous December, it is found that there was a decrease except in the years 1906, 1907, 1908, 1911 and 1912, in which years it appears that the continuous tendency to increase from year to year was greater than the seasonal tendency to decrease.

*II. Savings Banks.**

The deposits in Savings Banks consist of two groups—those in the Post Office Savings Banks which are set out in Tables II and II (A), and those in Trustees Savings Banks, shown in Tables III. and III. (A).

(a) *Post Office.*

It will be observed from Table II. that on the 31st December, 1912, the estimated balances in the Post Office Savings Banks in Ireland amounted to £12,824,000, as compared with £12,479,000 for the corresponding date in 1911, being an increase of £345,000. This Table shows that comparing the balances on the 31st December of each of the last twenty years with the balances on the 31st December of the previous year there was an increase in every instance with the exception of the year 1907.

* For a note on the history of Savings Banks see the half-yearly "Report on Banking, Railway, and Shipping Statistics, Ireland," [June, 1900] (Cd. 335—1900) issued by the Department.

Table II. (A) shows by half-years, since June, 1902, the accumulation of deposits in the Post Office Savings Banks. From this Table it appears that there has been an increase in each half-year, with the exception of that ending 31st December, 1907. The balance due to depositors on 31st December, 1912, compared with that due on 30th June, 1912, shows an increase of £93,000.

Tables IV. and IV.A. show the progress of the total accumulation of small savings in Post Office and Trustees Banks in Ireland. From Table IV. it will be seen that the total amount in the Post Office and Trustees Savings

Banks in Ireland on the 31st December, 1912, was £15,430,000, as compared with £15,045,000 on 31st December, 1911. There was thus an increase of £385,000 in the year 1912, as compared with an increase of £599,000 in the year 1911.

It will also be observed that with the exception of the year 1907 there has been an increase in each year since 1892, and that the balance in Savings Banks on the 31st December, 1912, was more than two and a half times the amount to the credit of depositors at the close of the year 1892.

Table IV. (A), in which the amount of small savings is set forth by half-years for the past eleven years, shows that,

with the exception of that for the half-year ended 31st December, 1907, the half-yearly balances in Savings Banks in Ireland continuously increased. The increase in the six months ended 31st December last was £100,000. As between the Post Office Savings Banks and the Trustees Savings Banks, this increase of £100,000 in the Balances for the December half-year, 1912, is made up of an increase of £93,000 in the case of the former, and an increase of £7,000 in the case of the latter.

RAILWAYS.

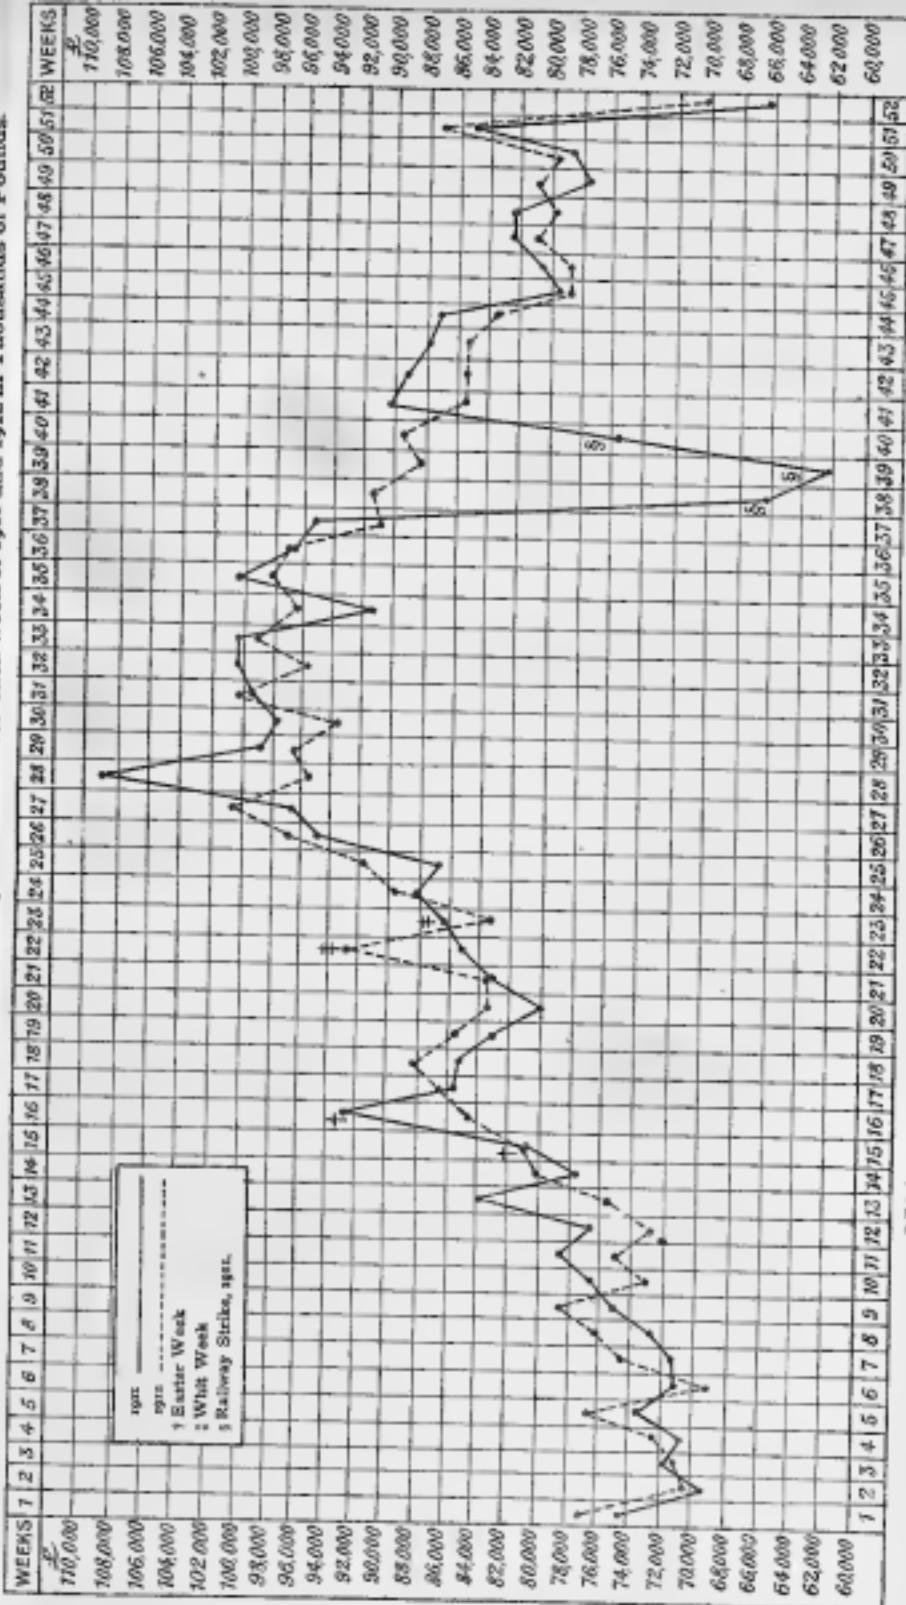

The receipts of Irish Railways, week by week, for the year 1912 have been supplied to this Department by the authorities of the several Companies, and will be found tabulated in Table VIII., and compared with the receipts for the year 1911. This Table does not include the returns of the Light Railways of Ireland.

A review of the weekly traffic returns shows that in 27 weeks the receipts exceeded those for the corresponding weeks of the year 1911, and in 25 weeks the receipts were below those for the corresponding periods, with the net result that the total receipts for the 52 weeks of the year 1912 amounted to £4,396,272, an increase of £42,965, or 1.0 per cent., as compared with the amount received in the preceding year. This net increase would have been much greater but for the considerable decrease in receipts for live stock traffic occasioned by the restrictions on movements of live stock necessitated by the outbreak of foot and mouth disease.

The diagram which faces this page shows the gross amounts (in thousands of pounds) received by Irish Railways in respect of goods and passengers in each week of the years 1911 and 1912. It will be noticed that the two curves show the same general tendencies towards seasonal change. They are lowest at the beginning of the year, rise to their maxima in July, and begin to decline again from the middle of August to the end of the year. The closeness with which the two curves approximate each other is evidence of the permanent nature of the conditions affecting the Railway receipts from year to year. The receipts for Easter week are marked in the diagram with a †. On comparing the two curves the outstanding feature is the enormous decrease in receipts in the 38th, 39th and 40th weeks of the year 1911, the three weeks during which the strike of Railway employees was general on the Irish Railway lines. Each of the three weeks is marked with a §.

The total receipts for the year 1912 were as above stated £4,396,272, as against £4,353,307 in 1911, £4,309,057 in 1910, £4,180,023 in 1909, £4,105,549 in 1908, £4,152,749 in 1907, £4,027,103 in 1906, £3,958,880 in 1905, £3,981,779 in 1904, £3,935,996 in 1903, £3,910,925 in 1902, £3,667,679 in 1901,

£3,681,018 in 1900, £3,600,293 in 1899, £3,493,389 in 1898, £3,442,036 in 1897, £3,387,409 in 1896, £3,368,282 in 1895, £3,303,739 in 1894, £3,181,043 in 1893, £3,103,651 in 1892, and £3,147,458 in 1891, when the receipts were higher than those for any previous year. It should be stated that the weekly receipts published in this table only approximate to completeness. The complete figures for each year are published annually by the Board of Trade.

This Report includes a statistical record—Tables IX., X., and XI.—of Irish Railways (including Light Railways) for each year since 1901. These figures are compiled from the annual statistical returns furnished by the several Railway Companies to the Board of Trade in accordance with the requirements of the Regulations of Railways Act, 1871.
